CARE

A lean structure built for fast customer response.

From hospital engagement to routine supply.

01 | Customer coverage

Government and private hospital engagement, decision-maker follow-up and department demonstrations.

02 | Tender execution

Quotation, documentation, awarding follow-up and post-award product classification.

03 | Clinical introduction

Product positioning, samples, evaluation support and study summaries for end-users.

04 | Logistics support

Supplier coordination, import documentation, freight planning and UAE-wide delivery.

A practical route to adoption for international manufacturers.

STEP 1

Product readiness

CE/FDA files, packaging details, authorization letter and technical documents.

STEP 2

Clinical evaluation

Target departments, product samples, demonstrations and structured feedback.

STEP 3

Tender & pricing

Competitive quotation, forecast planning and customer-specific positioning.

STEP 4

Supply continuity

Import permit, stock planning, delivery coordination and after-sales support.

Objective: represent international medical brands with professional market entry, compliance support and consistent customer service.

**Your trusted UAE partner for
medical disposables and
healthcare technologies.**
